

What is CONSILIUM?

ICanProve.IT

Consilium is a Latin word that simply means 'plan' or 'arrange'.

Using this scheduling, routing & notification platform, drivers sequence their stops; customers track the vehicle; and managers have total top-down visibility.

"*Consilium* allows businesses to really stand out from the crowd when their end-customers can track their parcel to the door."

Gavin Urtel, ICanProve.IT

Why choose Consilium from ICanProve.IT?

With Consilium, you not only have better control and visibility of your drivers' daily schedules, but you also massively improve the experience for your customers.

No longer are customers clueless as to when your driver will be at their door. They get an automated message, with a 20-minute window, and a link where they can track your vehicle's progress on a map.

Key features

1. Our **daily schedule** allows efficient proactive planning and route finding, with live tracking of each stop-off and ETAs for the next stop off point.
2. **Customer alerts** are automated when the ETA is known. Sending an SMS to the customer with a link to a live-updating moving-pin map.
3. **Integrated** with your existing FMS suite for simplicity and superior control. **Single-click connectivity** to live reports and add-ons, like video.

What can you expect to gain?

- Efficiency savings from better route planning
- Happy customers as they track their deliveries to their door
- Drivers who are better supported without loss of control
- Improved management visibility of daily stop-offs
- Personalised customer alerts by SMS
